LINEA AUREA

DOCUMENTA

Information sheet · November 2026
lineaaurea.de

See missing records. *Identify handover gaps.*

LAD brings together record status, deadlines and open issues across your assets and networks — for **project management, document management and operations**. Not a new DMS, but a control center on top.

CDE/DMS-neutral · sits on top of your systems | **Read-only** at operational boundaries | Demo with synthetic data

HOW IT WORKS

From your systems to the decision — in four steps.

1 **Connect**
Read-only onto SAP, ELO, GIS, SharePoint, CDE and more. Nothing is replaced or migrated.

2 **Structure**
Every document becomes a record object with type, asset, version, deadline and gate.

3 **Evaluate**
Coverage, gaps, deadlines and handover readiness in the control center — no list maintenance.

4 **Decide**
See early what is missing — act before it gets expensive. Every status light traceable to its record.

ONE CORE · TWELVE SECTORS

12,719 document types in twelve sectors — from electricity to nuclear decommissioning, 3,878 of them in development.
All sectors on the back →

SECURITY & OPERATIONS

Designed for the critical infrastructure environment.

- **No intervention in operations** — read-only, no write-back.
- **Runs wherever you want** — on-premises or in your own cloud.
- **Metadata, not content** — document content only by agreement.
- **Traceable** — changes logged with time and author.

WHAT YOU GET

Start small. Grow with your network.

ENTRY

Pilot
from €29,500 net · 8–12 weeks
One network section, ready in 8–12 weeks — the proof of value before the decision. Works with exports or a defined extract.

Control License
Annual license by discipline
The ongoing control center: all domain packs for your networks, read-only adapters, ongoing updates.

Operator Program
Custom
Multiple networks, custom integrations, SLA & security — for early operator partners.

NEXT STEP

30-minute Fit Check

Together we look at where LAD makes a difference for you — no obligation, **no system access needed**.

ONE CORE · TWELVE SECTORS

The same record logic — for every infrastructure.

12,719

document types in twelve sectors

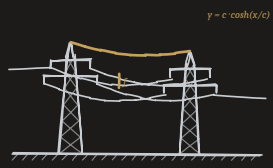

3,878 of them in development — seven sectors with a draft catalog, expert review pending.

83
governance attributes per type

334
rules check every entry

established · in development · count as of 3 Nov 2026

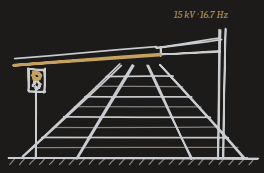

Electricity incl. PV and wind	5,210
Rail	1,513
Water and wastewater	749
Gas	737
District heating	632
Airports	941
Roads and tunnels	820
Hydrogen	467
Data centers	401
Food	328
Telecommunications	326
Nuclear power	595

Electricity 5,210

Catalog + templates

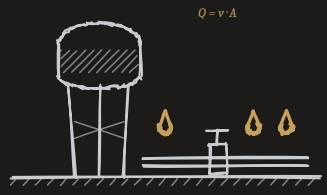

Overhead lines · Substations · Underground cables · HVDC · Offshore · Distribution grid · Ground-mounted PV · Onshore wind

Rail 1,513

Catalog + templates

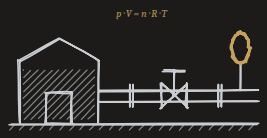

Track · Signal box · Signalling and train control · Overhead line · Civil structures

Water and wastewater 749

Catalog · templates per project

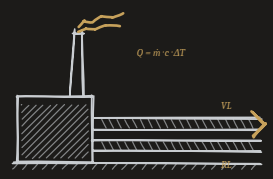

Water treatment plant · Distribution · Storage · Sewer network · Treatment plant

Gas 737

Catalog · templates per project

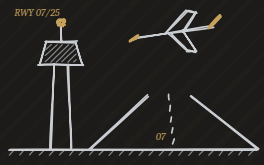

Pipeline and route · Pressure control · Compressors · Storage · Odorization

District heating 632

Catalog + templates

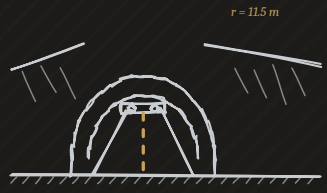

Route · Heating plant · Transfer station · Heat storage · CHP

Airports 941

Draft catalog · in development

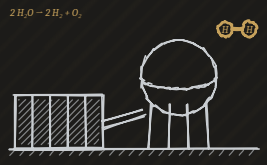

Airfield lighting · Aviation fuel · Fire protection · Zones and access · Power supply

Roads and tunnels 820

Draft catalog · in development

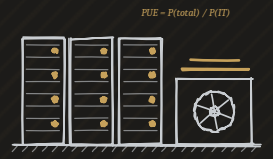

Tunnel construction · Structural inspection · Operating equipment · Traffic control

Hydrogen 467

Draft catalog · in development

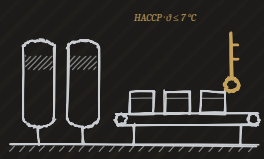

Explosion protection · Plant safety · Permitting · Refuelling station

Data centers 401

Draft catalog · in development

UPS · Standby power · Power distribution · Fire protection · Information security

Food 328

Draft catalog · in development

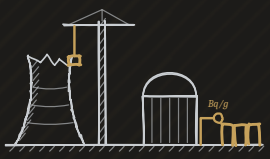

HACCP · Refrigeration · Process water · Permitting · Acceptance

Telecommunications 326

Draft catalog · in development

Network operations · Electromagnetic fields · Rights of way · Power supply

Nuclear power 595

Draft catalog · in development

Decommissioning · Clearance · Radioactive waste · Transport · Radiation protection
